The Gifts of Transcendence: Moving beyond your story

Who are you left with when everything you have identified with falls away? In the darkness, when the ego is completely shattered, we finally begin to see the truth of the power we hold. Where does our heart break and what are we here to do?

In this potent and thought-provoking talk, Beáta Alföldi brings her dynamic stage presence to explore life at a deeper, more profound level. She identifies how to overcome the limitations of 'identity' and step into the magnificence and embodied brilliance of your absolute truth.

With the potency and grace of embodied wisdom and genuine humility, Beáta guides the audience beneath the layers of the stories each person can relate to. Within two weeks of

her son's death, her mother was diagnosed with terminal cancer. She lost her family, her marriage, her home and her income. The way Beáta navigated these profound challenges to rebuild her life has led to a deep sense of self-love, courage and gratitude, which is today reflected back to her in every area of her life.
